Emivest to increase production of SJ30

Emivest Aerospace plans to significantly increase the production rate of its SJ30 light jet over the next two years, the company said this week. It also plans to restructure the company to improve efficiencies.

Emivest Aerospace Corp. is the result of a partnership formed in June 2008 when Emirates Investment and Development Company PSC (Emivest) acquired 80 percent interest in the aircraft manufacturing company. The SJ30 is produced in San Antonio.

The plane is on display at the European Business Aviation Conference and Exhibition in Geneva, Switzerland this month.
